Introduction

The `Vultr CLI bare-metal tags` command allows you to manage tags associated with Bare Metal instances, enabling easier resource organization and filtering in your Vultr infrastructure.

Usage

CONSOLE

```
$ vultr-cli bare-metal tags <Bare Metal ID> [flags]
```

Examples

CONSOLE

```
# Full example
$ vultr-cli bare-metal tags <bareMetalID> tags="tag-1,tag-2"

# Shortened example with aliases
$ vultr-cli bm tags <bareMetalID> -t="tag-1,tag-2"
```

Flags

Shorthand	Long Version	Description
-t	--tags	A comma separated list of tags to apply to the server

VULTR
